

CUMULUS

Firmware update Instructions

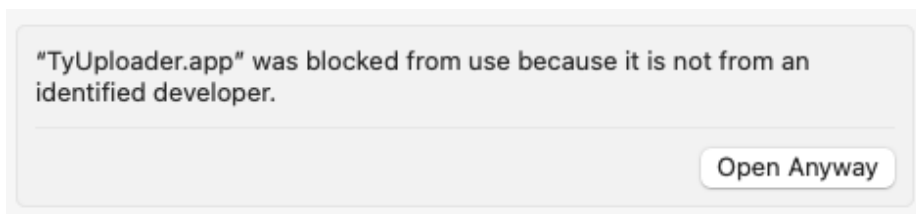

Download [Tytools Software](#) first at the top of the Manual & Firmware tab.

Mac

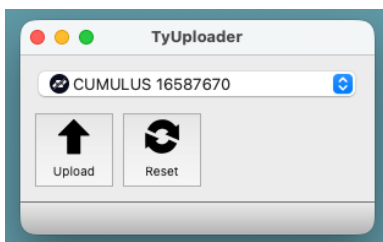

1. Open tytools_0.9.9_osx.dmg
2. Copy TyUploader.app into the Applications folder
3. Open the TyUploader.app

1. You will likely get a developer verification error and will not be able to open. If this happens, open system settings/ Privacy & Security. Scroll down until you see the image below and click Open Anyway.

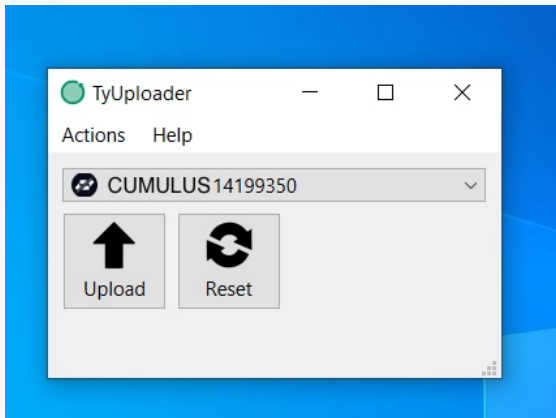

4. Once opened and Cumulus is connect to your computer, you will see CUMULUS followed by a string of numbers in the select dropdown.

5. Click the Upload button and open the hex file included in the zip.
6. Cumulus will update and restart.

Windows

1. Unzip the TyTools zip file.
2. Open TyUploader.
3. Once opened and Cumulus is connect to your computer, you will see CUMULUS followed by a string of numbers in the select dropdown.

4. Click the Upload button and open the hex file included in the zip.
5. Cumulus will update and restart.
